

Objective

I am a newly trained AWS Certified Cloud Practitioner built on 20+ years' experience applying my SME in EDW - Business Intelligence - Data Integration (ETL) that span across Manufacturing, Consulting, Healthcare and Entertainment sectors. With the goal of strict confidential data security compliance, such as HIPAA & SOX and pursuing real-time operational Data Analytics efficiency that will benefit significant savings by trading capital expenses (on-prem) vs variable expenses (pay-as-you-go) Cloud Computing platform.

Selected Accomplishments

- Leverage new innovative Bible translation method, MAST, empowering native mother tongue translators producing fast translation with accuracy, naturalness, culturally relevant Bibles ensuring high acceptance rate by the local churches. Project Management utilized open-source apps & platform securing translation data on the cloud. Published 5 Gateway Languages Open Source (ULB) Bible with supporting resources (Commentary, Questions, and Key Words) that reduced ~66% timeline from avg 5 years to 1.5 year, and operational budget savings of \$1,100,000, ~66% less cost than other GLs benchmark.
- Worked in conjunction with consulting firm and various vendors and successfully charter 5-year EDW EMPI Roadmap initiative for the regional hospital systems. This Meaningful Use single-version-of-truth platform consolidates patients & financial data from various EHR/EMR, legacy systems, social media, hand written docs, etc.. enabling real-time BI data analytics capability instead of spending days/months digging through silos of data repo for metrics reporting.

Employment History

Wycliffe Associates, Gateway Languages-Asia Reg Director, Orlando, FL/Singapore Nov 2017 – Sep 2020
KPMG LLP (Beacon Partners), Senior Associate, Advisory, San Francisco, CA Feb 2015 – Nov 2015
